

Eunos MRT station^[a] is an [elevated Mass Rapid Transit \(MRT\)](#) station on the [East–West Line](#) in [Geylang](#), Singapore. Operated by [SMRT Trains](#), the station primarily serves the [Eunos](#) subzone of Geylang as well as the [Eunos Bus Interchange](#).

Plans for the station were first outlined in May 1982, and its construction was announced in October 1983 as part of Phase II of the MRT system. During construction, one of the contractors, Oh Teck Thye, was put under [receivership](#), resulting in its joint venture with the Okumura Corporation to be terminated and Okumura taking over the project. The station opened on 4 November 1989. [Platform screen doors](#) were introduced in 2011, along with [high volume low speed fans](#) in 2013.

The design of the station's roof took inspiration from traditional [Minangkabau architecture](#). Additionally, there are two murals created by local artist Erica Wee as a part of SMRT's heritage-themed *Comic Connect* public art display. The murals showcase the history of Eunos as well as [Katong](#) and [Joo Chiat](#).

History

Eunos station was first announced in May 1982 in the initial MRT plans.^[7] It was announced in October 1983 that the station would be part of Phase II of the MRT system.^[8]

There were several joint ventures between companies that prequalified for Contract 303 by May 1985, which initially detailed the construction of [Paya Lebar station](#) as well as a viaduct from Paya Lebar to Eunos stations.^{[9][10]} Ultimately, the contract was awarded to a Japanese–Singaporean joint venture between Okumura Corporation and Oh Teck Thye for [S\\$60 million](#) (1985) ([US\\$27.27 million](#)) in December 1985.^[11] Okumura had a 60% interest in the contract whilst Oh Teck Thye had 40%.^[12] By then, the contract expanded to include the construction of Eunos station as well as viaducts to [Kembangan station](#).^[11] Work began in the same month.^[12] On 30 December 1986, the joint venture between the two companies was terminated, with Okumura Corporation undertaking all the responsibilities of Contract 303.^[13] It was later found out that Oh Teck Thye owed [S\\$3 million](#) (1987) ([US\\$1.42 million](#)) to the [United Overseas Bank](#) (UOB) and was placed under [receivership](#) when it failed to repay its debts.^[14] Meanwhile, Okumura requested permission to take over Oh Teck Thye's part of the contract. *The Business Times* described it as "the first case of a joint-venture split in the MRT Project".^[12] By February 1986, 41% of the contract had been completed.^[14] That July, Swiss–Singaporean company VSL Systems Pte Ltd won the subcontract for the supply of post-tensioned cables and [pre-cast](#) beams for the station's viaducts.^[15] The station opened on 4 November 1989 as part of a stretch between [Marina Bay](#) and [Tanah Merah stations](#).^[16]

After the station's opening, its stairs had several design problems. In February 1996, a flight of stairs from the station's terrace to the ground underwent repairs after it had [sunk](#) into the ground. The difference between the concrete of the terrace and the soft soil of the ground resulted in a 40-centimetre (16 in) drop, which posed a risk for elderly riders and young children.^[17] A similar issue arose in August 2006 along with another stair-related issue. According to a letter published in *TODAY* by a commuter, the "[granite](#)-clad steps of grandiose design" at the station's south front exit "[led] to nowhere". The other flight of stairs was a set of steps connected to a [ramp](#) near Eunos Food Centre in the east side of the station, which was criticised for appearing to be [wheelchair accessible](#) when it was not.^[18] [SMRT Trains](#) clarified that the first set of stairs was meant to connect a carpark to the station, whilst the ramp was originally not meant for wheelchair

users. It added that works were underway to fix the first set of stairs, which was uneven due to sinking into the ground, and to remove the ramp's stairs to make it wheelchair-accessible.^{[\[19\]](#)}
